NOV 20 1964

1990

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

2. Next, gather relevant information and resources. This may include researching existing solutions, consulting experts, or collecting data.

3. Once the information is gathered, analyze it to identify the key factors and constraints. This step often involves breaking down the problem into smaller, more manageable parts.

4. Develop a plan or strategy to address the problem. This plan should outline the steps to be taken, the resources needed, and the expected outcomes.

5. Implement the plan and monitor progress. This involves putting the strategy into action and regularly checking in to see how things are going.

6. Finally, evaluate the results and make adjustments as needed. This step is crucial for ensuring that the solution is effective and efficient.

1. The following information was obtained from the records of the Department of the Interior, Bureau of Land Management, regarding the land owned by the United States in the State of California:

2. The total area of land owned by the United States in the State of California is approximately 100,000,000 acres.

3. The total area of land owned by the United States in the State of California is approximately 100,000,000 acres.

4. The total area of land owned by the United States in the State of California is approximately 100,000,000 acres.

5. The total area of land owned by the United States in the State of California is approximately 100,000,000 acres.

6. The total area of land owned by the United States in the State of California is approximately 100,000,000 acres.

7. The total area of land owned by the United States in the State of California is approximately 100,000,000 acres.

8. The total area of land owned by the United States in the State of California is approximately 100,000,000 acres.

9. The total area of land owned by the United States in the State of California is approximately 100,000,000 acres.

10. The total area of land owned by the United States in the State of California is approximately 100,000,000 acres.

WISTERIA. \*Grafted plants--no seedlings:

brachybotrys alba

Silky wisteria

Short clustered Japanese species--white flowers.

brachybotrys rosea

Similar to the preceding, but has rosy purple flowers.

Sinensis

Chinese wisteria

Strong grower. Sky blue flowers in long pendulous clusters.

Sinensis alba

White chinese wisteria

Similar to the preceding, but has showy white flowers.

Sinensis violacea plena

Double blue Chinese wisteria.

(Rare) Magnificent blue wisteria with lovely long clusters of double blue flowers.

Multijuga

Long clustered wisteria

Fine species with purplish flowers, immense long clusters.

Multijuga alba

White long clustered wisteria

Same as preceding only the flowers are white.

Multijuga rosea

Pink long clustered wisteria

Same as preceding only the flowers are pink.

Multijuga naga node

Purple clusters of flowers from 3-5' long.

4" pot (grafted plants) .75 each.

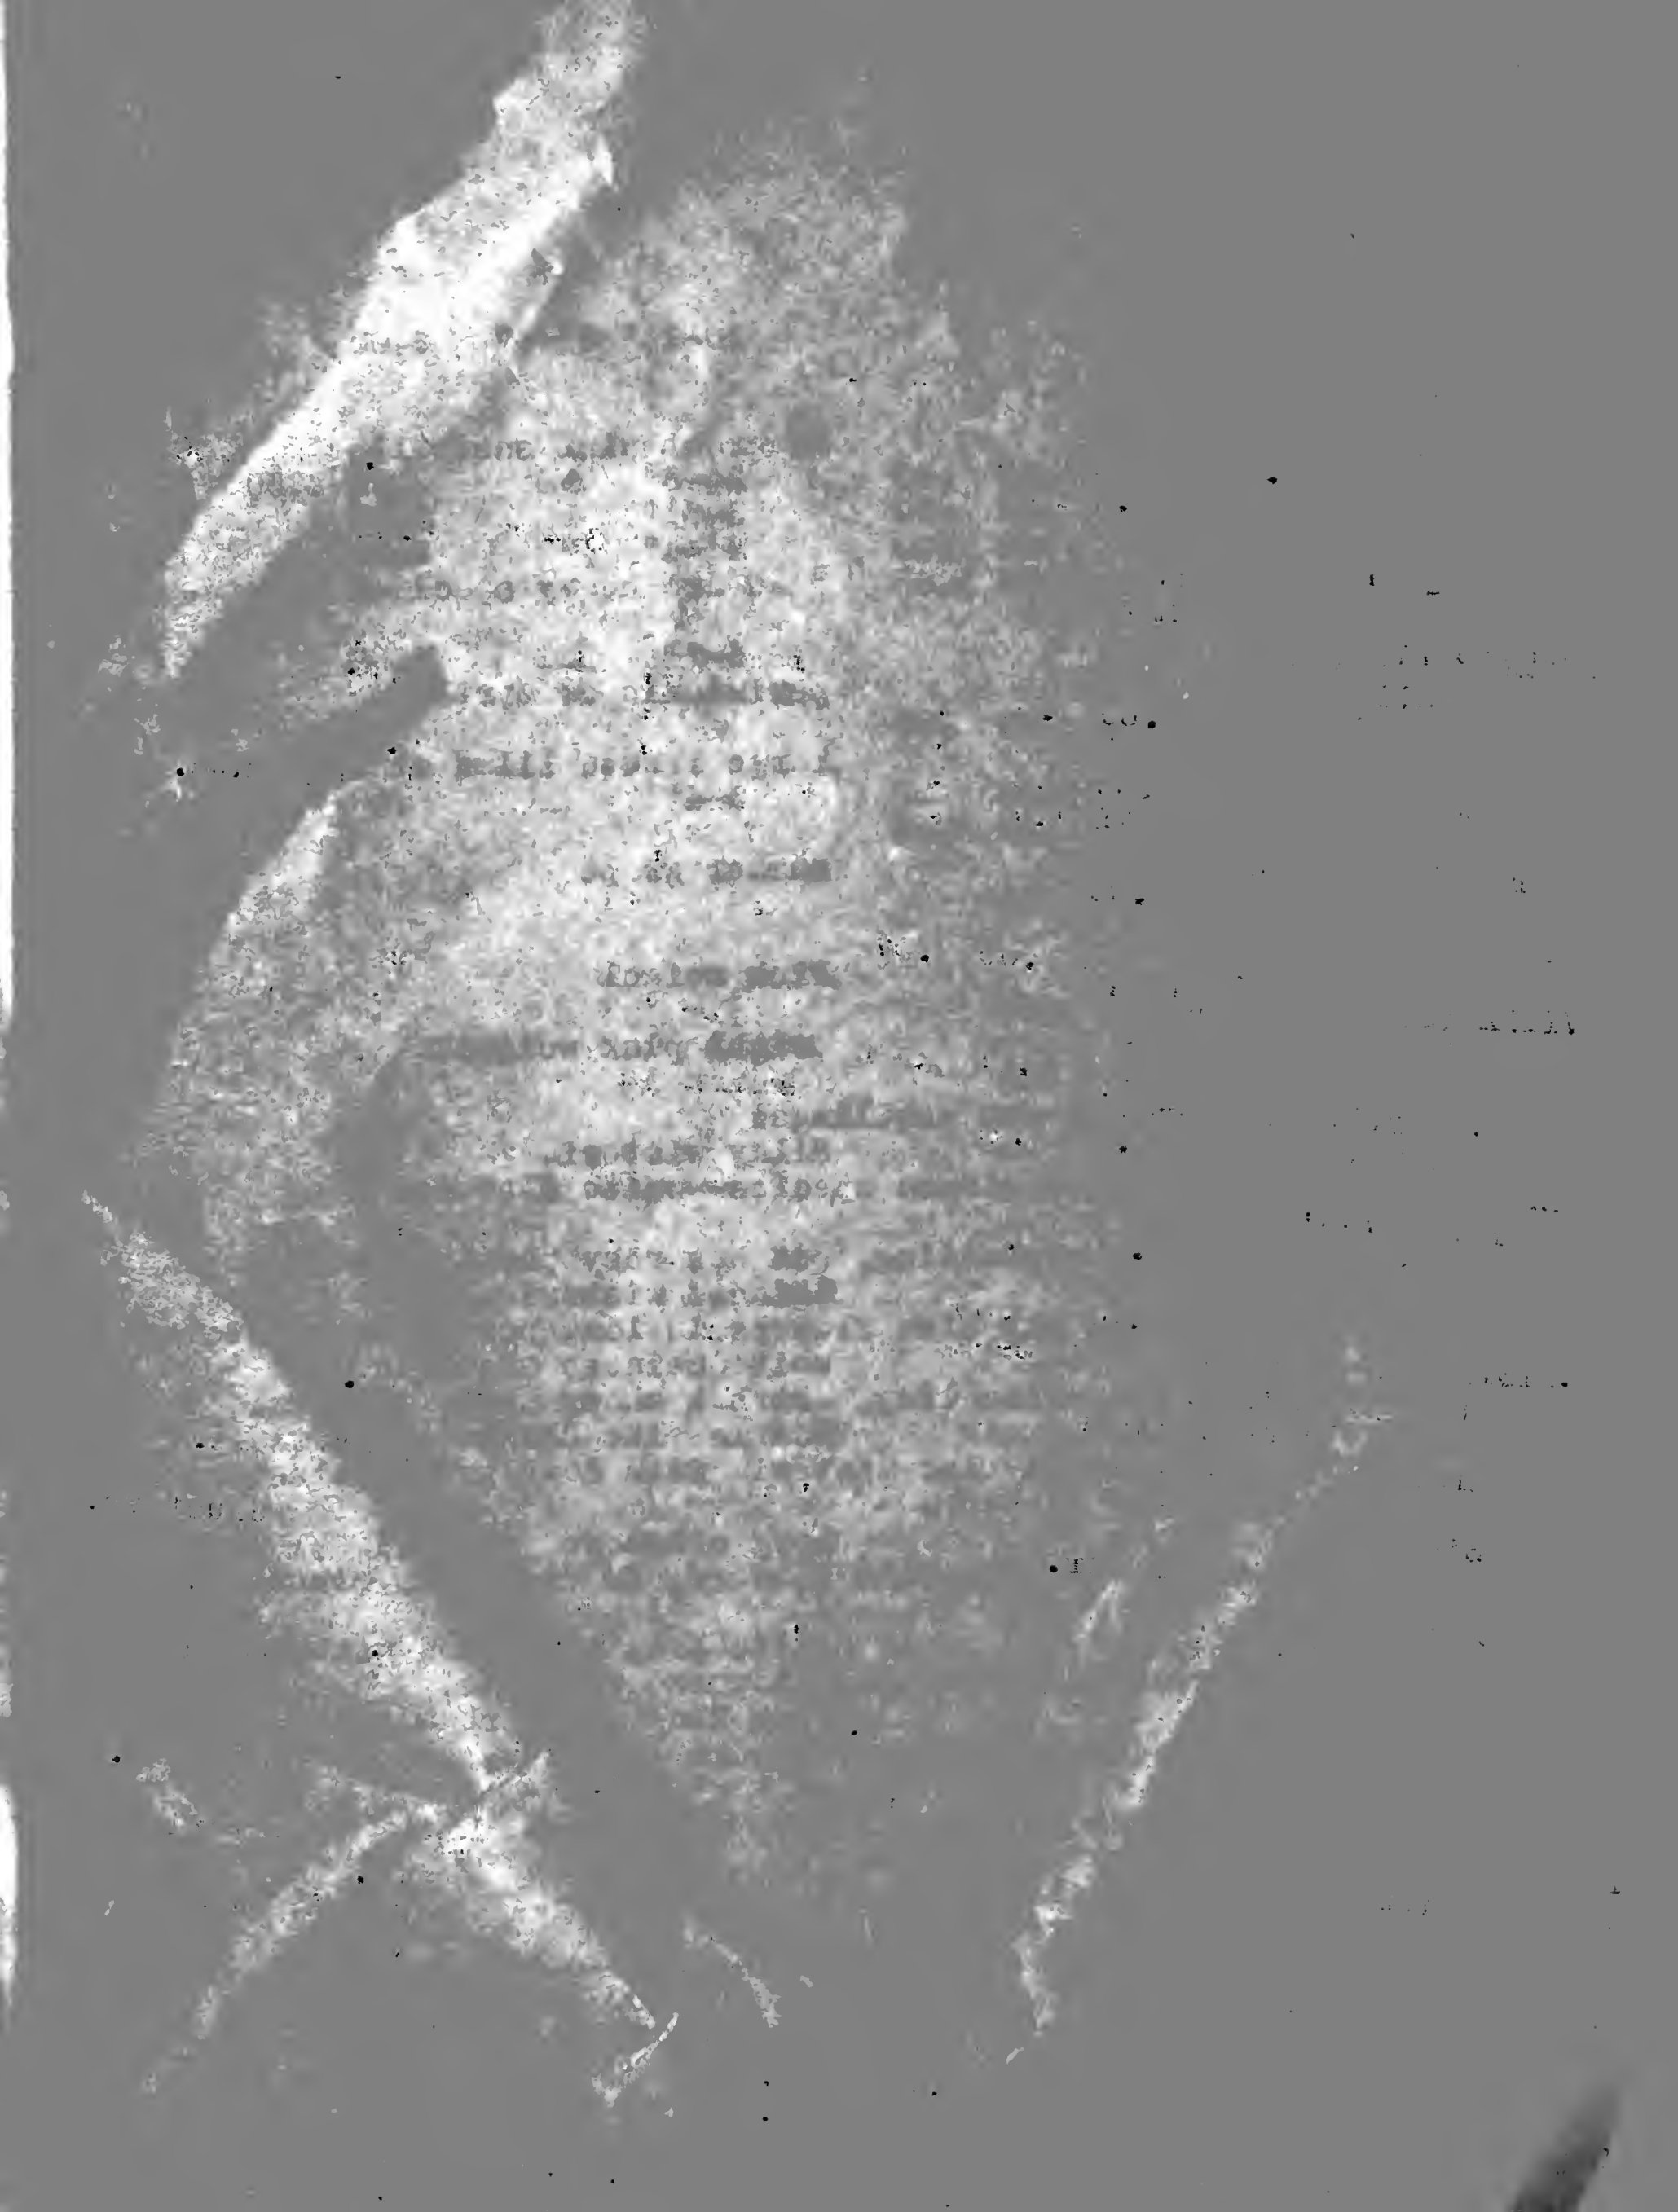

6" " (grafted plants) 1.50 each.

\*Except the following varieties:

Sinensis violacea plena, 4" pot grafted, 1.35 each.

" 6" pot grafted 2.00 each.

Multijuga naga node, 4" pot grafted, 1.35 each.

# RARE PLANTS:

The following are plants that are scarce and rare. These are all unusual and are very interesting.

## CORNUS florida pendula

Weeping white dogwood

This specie has the same general characteristics as the other dogwoods, having deciduous leaves and small white or greenish flowers in a terminal inflection. It is quite easily distinguished by its drooping branches.

	ea.	10	100
12-18"	1.00	9.00	
18-24" & 3	1.25	11.50	

	ea.	10	100
2-2½' & 3	2.00	17.50	
2½-3' "	3.00	25.00	

## DAVIDIA involucrata

Dove-tree.

This tree is the rarest plant in America. It required several years of dangerous traveling on foot in the wildest section of China to acquire the original seeds which were sent to America for germination. The Dove-Tree is a lovely specimen for the lawn. Grows to a height of 50 to 60 ft. with unusual creamy-white dove-like blossoms, from which it derives its name.

pot plants, \$3.50 each.

## HEMEROCALLIS

Day lily

My state -	Glistening deep yellow,	July-August.	4'	.50	each.
Gypsy -	Brilliant deep orange.	July.	3'	.50	each.
Goldeni -	Deep orange.	June-July.	3'	.50	each.
Mrs. W. H. Wyman-	Lovely pale yellow	August	4'	.50	each.
J. A. Crawford -	one of the finest				
	apricot and cadmium yellow.	June-July.	4'	.50	each.
Lamont -	Large, pale lemon yellow	July.	5'	.50	each.
The Gen -	Rich orange-yellow.	June.	5½'	.50	each.

## HYDRANGEA Petiolaria

Climbing Hydrangea.

2 in. pots	.30	each.	5 in. pots	1.25	each.
3 in. pots	.50	each.			
Schizophragma-hydrangeoides.			Japanese hydrangea vine.		
2 in. pots	.35	each.	5 in. pots.	1.25	each.
3 in. pots	.60	each.			

## JAPANESE TREE PEONIES.

Mixed colors:

Flowers very large and resemble crepe paper. Branches do not die back, they remain unharmed throughout winter freezing and grow to be small trees 4-6'.

3-yr. field plants, each 2.00

4-yr. field plants, each 3.00

## LIRIOPE 9 inches

graminifolia. Lovely grass-like foliage, flowers pinkish blue in August. Loves shade under rhododendrons and azaleas, where it is cool and moist. Splendid ground cover. 3 in. pot plants, \$20.00 per 100.

## OPHIOGOM

Japanese snakehead.

Japonicum. Shade loving plant. Grows in clumps 8-10 inches tall. Flowers are lilac blue. Foliage evergreen all winter, a real gem, blooms in August and September.

3 in. pot plants \$25.00 per 100.

Jaburan aureus variegatus. Somewhat similar to the preceding variety, foliage is striped yellow and green. Flowers purplish blue. 3 in. pot plants \$15.00 per 100.

## PICEA excelsa pilifera

West-shaped spruce.

PICEA continued.

This is of such extraordinary dense form and so closely branched that one wonders how the light ever gets to the lower branches. Branchlets in tight layers, the whole forming a dense, impenetrable head. It grows slowly,  $\frac{1}{4}$ - $1\frac{1}{2}$ " yearly. It is one of the true dwarf Evergreens. It's ultimate size is a matter dependant upon conditions. Because of it's size it is valuable for specimens, groups or hedges.

15 inches \$2.75 each. 20 inches \$4.00 each.  
18 inches 3.50 each

TAXUS ovata

Yew.

A rare yew of upright habit of growth: A cross between Taxus cuspidata and hibernica. Very dark green, stands terrific cold winters without browning, makes perfect specimen or is about the finest for yew hedges.

	ea.	10	100		ea.	10	100
